10 Essential Steps to Portfolio Management: There are no right or wrong metrics in determining which projects and work bring the most value to your organization but there is no reason to reinvent the wheel completely. Leverage best practices and internal governance already in place to make this complex task more feasible. Leverage a Portfolio Management/decision tool (such as PortfolioEngine) that supports your current processes and that is flexible enough to customize to fit your needs. Many organizations do not have a Portfolio Management process. In order to create a process where no process exists. In this free White Paper, EPM Live walks you through the Portfolio Planning process. Access this white paper at http://goo.gl/fuwQ0

10 ways to secure browsing in the enterprise: Every technology has a downside that will be exploited. As a result, the browser, often called the universal client, is an ever-growing conduit of malware into the modern enterprise. Truth is, malware and its risks are ever evolving with the demands of cybercriminals and black hats, and browsers just happen to be a particularly soft and tantalizing target. Unfortunately, history has shown us that the trend is only accelerating. Despite the more recent evolution of additional security features, the browser remains a good soft target when care isn’t taken to lock it down in your enterprise. It’s possible to improve your browser security stance by making some changes to people, procedures and technology. We don’t have to be lunch for the piranhas or a quick snack for the tiger; we can defend ourselves in the Internet jungle. Read at http://goo.gl/r78wA top 10 recommendations for improving the security of your browsing environment.

Video: Digital humanitarianism: The disastrous earthquake in Haiti taught humanitarian groups an unexpected lesson: the power of mobile devices to coordinate, inform, and guide relief efforts. At TEDxRC2, Paul Conneally shows extraordinary examples of social media and other new technologies becoming central to humanitarian aid. Paul Conneally is the public communications manager for the International Federation of the Red Cross and Red Crescent Societies, and a leader in using digital technologies for humanitarian aid. Watch this 11 min video at http://goo.gl/99j6o

Video: The secret structure of great talks: From the “I have a dream” speech to Steve Jobs’ iPhone launch, all great presentations have a common architecture. At TEDxEast, Nancy Duarte draws lessons on how to make a powerful call-to-action. Nancy Duarte believes that ideas are the most powerful tools people have. Her passion is to help every person learn to communicate their world-changing idea effectively. Watch this 18 min video at http://goo.gl/6i6W1

The Seven Types of Power Problems: Many of the mysteries of equipment failure, downtime, software and data corruption, are often the result of a problematic power supply. This white paper at http://goo.gl/51OFG will describe the most common types of power disturbances, what can cause them, what they can do to your critical equipment, and how to safeguard your equipment, using the IEEE standards for describing power quality problems.

A Guide to Modern IT Disaster Recovery: While your data center is critical to your ability to conduct business, events beyond your control (or even planned ones) can make IT services unavailable or highly limited. This situation, however rare, could be very damaging to the integrity of your business, your market credibility, and your customers’ satisfaction and loyalty. You can mitigate this risk by implementing a DR solution to protect your critical IT assets. A well-designed DR solution built on an intelligent virtual infrastructure can provide the required RTO and RPO while keeping the costs in check. Your DR plans can be tested in a nondisruptive way and benefit your IT department in areas beyond the typical DR needs. This guide at http://goo.gl/dNDzC provides insight and advice on how to build an effective disaster recovery strategy in the evolving world of virtual infrastructures, while mitigating the impact of so-called ‘Black Swan’ events in the data center. Practical, how-to best practices, real customer success testimonials and links to additional resources.

Top Learning Trends for 2012: Businesses are finding global success in developed and developing countries, but regardless of the industry or location, a keen eye on budget is necessary for long-term achievement. With top learning trends defined, where do you start to apply these concepts in order to drive business performance? The most practical way to get started is evaluating ways to use them to your greatest advantage given your organization’s current business environment and training strategies. This learning management whitepaper at http://goo.gl/6Oymd outlines the top 2012 trends in today’s learning management space and why they’re relevant.

End-to-End Encryption: The PCI Security Holy Grail: Encryption seems like the simple answer to data security problems. So why is end-to-end encryption not ubiquitous? Implementation challenges abound. This post at http://goo.gl/v3WGi deals with how to handle encryption’s ‘key issues’.

Google’s Research Awards Program: The Google Research Awards program aims to identify and support world-class, full-time faculty pursuing research in areas of mutual interest. Awards through this program are for one year and range from $10K-$150K. Applications for the next round of Google Research Awards will be accepted until 15 April 2012. For more information and to apply go to http://goo.gl/w8joQ
The in-depth guide to data destruction: A key part of any information security strategy is disposing of data once it's no longer needed. Failure to do so can lead to serious breaches of data-protection and privacy policies, compliance problems and added costs. When it comes to selecting ways to destroy data, organizations have a short menu. There are basically three options: overwriting, which is covering up old data with information; degaussing, which erases the magnetic field of the storage media; and physical destruction, which employs techniques such as disk shredding. Each of these techniques has benefits and drawbacks, experts say. Read the full article at http://goo.gl/KzyJB.

CISO Guide to Next Generation Threats: To regain the upper hand against next-generation attacks, enterprises must turn to true next-generation protection: signature-less, proactive and real time. Through constant testing of any suspicious code and blocking of communications with malicious hosts, next-generation protections combat advanced malware, zero-day and targeted APT attacks that bypass defenses like next-generation firewalls, IPS, antivirus, and Web gateways. Read this guide at http://goo.gl/3TeRV.

9 Secrets to Hassle-Free Data Management – Guide: Many of today's laws and regulations (like Sarbanes-Oxley or HIPAA) have strict rules on how you retain data, when you can delete it, how long you need to keep it, etc. This paper at http://goo.gl/myV0C explores: the pressing need for tiering archive data; 9 things you need to know about new storage-based data tiering; and the benefits a storage hierarchy provides.

Creative Commons: Law & Etiquette: Creative Commons was created to provide an alternative to copyright licenses, royalties, and sticky attribution conditions for creative works. It allows users to manage their traditional “all rights reserved” copyright into “some rights reserved” to share their content under the conditions they specify. This article at http://goo.gl/eRD1u gives an overview of the different types of CC licenses and explains the legal and polite way to attribute Creative Commons content that you use.

Using QR Codes for Your Small Business: Last year I flew out of LAX and instead of printing my boarding pass, the airline emailed me a QR code. When I reached the check-in point, the attendant simply scanned my code directly from my phone and that was it. Simple as that. It seems as though everywhere you go these days, you are bound to bump into a QR code somewhere. The buzz surrounding them has now reached epic proportions and as being mobile friendly they are becoming more common than ever. Read the full post at http://goo.gl/U3PBN.

IT risk assessment frameworks: real-world experience: Assessing and managing risk is a high priority for many organizations, and given the turbulent state of information security vulnerabilities and the need to be compliant with so many regulations, it's a huge challenge. Several formal IT risk-assessment frameworks have emerged over the years to help guide security and risk executives through the process. At http://goo.gl/fcZ0L look at few key frameworks, some of their strengths and weaknesses, with emphasis on input from those who have used them in real-world settings.

Programming Methodology Lectures by Professor Mehran Sahami, Stanford CS Dept.: This course on Programming Methodology (CS106A) is an Introduction to the engineering of computer applications emphasizing modern software engineering principles: object-oriented design, decomposition, encapsulation, abstraction, and testing. Uses the Java programming language. Emphasis is on good programming style and the built-in facilities of the Java language. This is a series 26 lectures of about 45 to 50 minutes each. Watch them at http://goo.gl/RLwD4.

The IPv6 Implementation Action Plan: If you're considering a migration to IPv6, you won't want to miss this episode. Join Cisco experts as they walk through the keys to successful implementation, including the security implications of IPv6 integration, real-world experiences with IPv6 and a detailed assessment of the realities of NAT64 translation. Watch this 1 hr 7 min video at http://goo.gl/tBnKD.

Access to Books from the publisher Knovel: Knovel, a leading publisher of text, reference books & conf. proceeding in engineering, technology and advanced science areas, offers registered users, free access to 10 premier handbooks and databases and every week free access to two of the selected books. Know more about this at http://goo.gl/iBnKD.

Gartner Report: 2012 Magic Quadrant for BI Platforms: Thinking about BI? Don’t make a move without Gartner’s authoritative Magic Quadrant for Business Intelligence Platforms report. You’ll find out why and how business users are increasingly driving BI decisions. As Gartner explains: “Data discovery alternatives to enterprise BI platforms offer highly interactive and graphical user interfaces built on in-memory architectures to address business users’ unmet ease-of-use and rapid deployment needs. What began as a market buying trend in 2010 has only continued to expand.” Access the report at http://goo.gl/BHMXP.

As 60th Anniversary Nears, Tape Reinvents Itself: The 60th anniversary of IBM's digital tape is coming up in May. Oh yeah, and tape is dead. Or so industry pundits have declared, echoing similar prognostications for the mainframe. But in reality, tape has a long life ahead of it. At 60, in many ways, it's just getting started. Read the full story at http://goo.gl/GRXJW.

Apple Invents a Killer 3D Imaging Camera for iOS Devices: Apple has invented a killer 3D imaging camera that will apply to both still photography and video. The new cameras in development will utilize new depth-detection sensors such as LIDAR, RADAR and Laser that will create stereo disparity maps in creating 3D imagery. Additionally,
the cameras will use advanced chrominance and luminance Sensors for superior color accuracy. And if that wasn't enough, the new cameras will not only include facial recognition but also facial gesturing recognition. Read the full post at http://goo.gl/EhJYz

Listening to employees: The ‘Beyond Bureaucracy’ M-Prize winners: Seven winning entries in a contest McKinsey cosponsored with Gary Hamel’s Management Innovation eXchange (MIX) and Harvard Business Review reveal executive thinking on the importance of engaging employees in an open and realistic way. Read the full article at http://goo.gl/ap752

Interactive Health Tutorials: MedlinePlus presents interactive health tutorials from the Patient Education Institute. Learn about the symptoms, diagnosis and treatment for a variety of diseases and conditions. Also learn about surgeries, prevention and wellness. Each tutorial includes animated graphics, audio and easy-to-read language. To view visit http://goo.gl/NTBMA

ERCIM "Alain Bensoussan” Fellowship: ERCIM, the European Research Consortium for Informatics and Mathematics, offers fellowships (24 months / 12 months) for PhD holders from all over the world. Topics cover most disciplines in Computer Science, Information Technology, and Applied Mathematics. Fellows are hosted in leading European Research Institutes. Application deadline is 30th April 2012. Pl. visit http://fellowship.ercim.eu/ for details.

Consultants Commandments

- If at first you don't succeed, destroy all evidence that you tried.
- A conclusion is the place where you got tired of thinking.
- Experience is something you don't get until just after you need it.
- For every action, there is an equal and opposite criticism.
- He who hesitates is probably right.
- Never do card tricks for the group you play poker with.
- No one is listening until you make a mistake.
- Success always occurs in private, and failure in full view.
- To steal ideas from one person is plagiarism; to steal from many is research.
- Two wrongs are only the beginning.
- Work is accomplished by those employees who are still striving to reach their level of incompetence.
- The sooner you fall behind, the more time you’ll have to catch up. (Project Management at its best).

The Three Envelopes

A new manager spends a week at his new office with the manager he is replacing. On the last day the departing manager tells him, "I have left three numbered envelopes in the desk drawer. Open an envelope if you encounter a crisis you can't solve."

Three months down the track there is a major drama, everything goes wrong - the usual stuff - and the manager feels very threatened by it all. He remembers the parting words of his predecessor and opens the first envelope. The message inside says "Blame your predecessor!" He does this and gets off the hook.

About half a year later, the company is experiencing a dip in sales, combined with serious product problems. The manager quickly opens the second envelope. The message read, "Reorganize!" This he does, and the company quickly rebounds.

Three months later, at his next crisis, he opens the third envelope. The message inside says "Prepare three envelopes".

ICT Events

ICT News: Voices & Views
- Mobile handset market grows 10% in 2011. 183 million handsets were sold - CyberMedia Research.
- Mobile-driven healthcare services biz pegged at Rs. 3,000 cr in India. Global opportunity is at $23 billion - PwC India.
- Media viewing, entertainment happen more on cellphones than TV sets - InMobi.
- Mobile tariffs to rise if charged for spectrum - Mittal.
- In 2011, cloud services helped to generate $600 billion business and 1.5 million new jobs - IDC.
- 30% of organizations will block social media sites by 2014, compared to 50% in 2010 - Gartner.
- Data center market in India to reach $609.1 million in 2012 and grow at a CAGR of 21% to touch $1.3 billion in 2016 - Gartner.
- Global data center traffic estimated to grow at 33% annually till 2015, surpassing 4.8 zettabytes a year.
- Govt should regulate social media - Kris Gopalakrishnan.
- Indians bought 3 lakh units of tablets in 2011 compared to 60,000 in 2010 - Frost & Sullivan.
- App market place (with over 10 lakh applications) has become an estimated $20-billion economy.
- The ICT sector in UK valued at £110 billion provides direct employment to 6 lakh and indirectly employs 11 lakh.
- Mobile money users, in Middle East, Asia, and Africa are expected to cross 1 billion by 2015, India to account for 100 million - Tavess Research.
- By 2014, personal cloud to replace PC in users' digital lives - Gartner.
- The average cost of mobile incidents is pegged at Rs. 42.32 lakh per organization annually - Symantec Corp.
- For falling employee productivity, social networking is to be blamed - www.salry.com
- Semiconductor sector to grow 4% this year - Gartner.
- The 2012 Budget is disappointing on various counts - NASSCOM
- Govt to roll out soon an electronics policy having a production target of $400 billion by 2020.
- Nation's first telecom tech incubator planned in Kerala.
- Spectrum auction to end by Jan-Feb 2013 - FinMin.
- AP IT industry calls for abolishing MAT levy.
- Cybercriminals set up entire fake app store.
- New 2G spectrum auction will be open to all bidders - DoT.
- Govt. plans to set up a National Cyber Coordination Centre (NCCC) for assessing cyber security threat on a real-time basis and monitoring of Internet traffic.
- Due to security concerns, DoT to make it mandatory for telcos to procure locally manufactured and personalized SIM cards.
- TN Govt. to support Microsoft’s Cloud Computing Centers.
- TRAI issues consultation paper on spectrum auction.
- An interministerial panel slams National Technical Research Organisation (NTRO) for roping in a pvt. company for setting the Internet monitoring system.
- Montek suggests real-time sharing of unused spectrum.
- Telecom should be given ‘infrastructure sector’ status - CEO, Bharti Airtel.
- Now, 63% of households have telephone connection.
- Call tracking must be operational by May 31 - --Govt. tells telcos.
- Govt. expects Rs. 40,000 cr from spectrum sale.
- Spectrum auction to end by Jan-Feb 2013 - FinMin.
- $30-40 I-slate tablets for school students by NTU of Singapore and the NGO Villages for Development and Learning Foundation (ViDAL).
- Govt. to roll out soon an electronics policy having a production target of $400 billion by 2020.
- Nation's first telecom tech incubator planned in Kerala.
- TRAI disconnects 22,769 mobile connections for sending unwanted telemarketing SMS.

- Nokia to exit mobile money business globally.
- Matrix cuts call rates from UK to India at Re 1/min.
- Apple having $100 billion in reserves announces $2.65/share dividend, $10 billion buyback plan.
- EMC to offer courses in social networking analytics.
- Tech Mahindra, Satyam to merge in the ratio of 2:17.
- Nine small and medium IT companies have formed a consortium, IT SME India, to tap global markets.
- Facebook has warned legal action against companies that ask job applicants for passwords to the social network.
- NIIT Tech implements an automated Content Management and Delivery system at Singapore Parliament.

Books

Brief reviews of books useful to students and professionals are included in this column. The publishers -- Wiley India Pvt. Ltd and Tata McGraw Hill Education Pvt Ltd have come forward to present these books to the winners of the Info Quiz.

**iPad in the Enterprise – Developing and Deploying Business applications:** iPads are now in the hands of workers in virtually every level of companies in almost every industry. But using iPad apps in the enterprise is more complex than simply clicking an icon from the App Store. It presents unique challenges around software development, system integration, information security, application deployment, and device management. The author in this book, presents a guide for developing a mobile strategy to properly take advantage of this transformative technology. From this book, one will learn about the high-level software architectural options, the importance of design and user experience, application development tools and techniques, and best practices for deploying applications and managing iPads in the enterprise. This book is a valuable read for any enterprise CIO and IT leader Author: Nathan Clevenger. Published by Wiley India Pvt. Ltd. Pages: 408. Price: Rs.549=. More on the book and detailed contents at [http://goo.gl/Fa1iB](http://goo.gl/Fa1iB)

Readers of CSI-eNL can get this book at 20% discount with free shipping. Contact: [abbhardwaj@wiley.com](mailto:abbhardwaj@wiley.com) (This book is being given as a prize to the Info Quiz Winners)

**Java Programming:** Java offers several advantages over other languages. It is small and simple, and it is object oriented. It can be compiled or interpreted. It is platform independent, robust and secure. It supports multithreading and dynamic in nature. This book on Java provides thorough coverage of Java syntax, the event model, threads, network programming, I/O programming, and applets. GUI building in Java is discussed, and the book also includes examples of how to use strings, collections, and several utility classes. This is a comprehensive, expert-level guide to Java programming. This book written by a prominent international speaker and Java consultant who trains Oracle certified instructors and corporate clients, provides advanced coverage of the new features of Java, covers multi-lingual support, support for JavaScript and other scripting languages, and JavaFX and includes hands-on programming exercises and examples throughout. Author: Poornachandra Sarang. Published by Tata McGraw Hill Education Pvt Ltd. Pages: 668. Price: Rs. 495=/. More about the book at [http://goo.gl/S4uOd](http://goo.gl/S4uOd) Readers of CSI-eNL can get this book at 20% discount with free shipping. Contact: [Chinnmayee_Raju@mcgraw-hill.com](mailto:Chinnmayee_Raju@mcgraw-hill.com) (This book is being given as a prize to the Info Quiz Winners)

**Network Security Essentials: Applications and Standards:** In this age of universal electronic connectivity, viruses and hackers, electronic eavesdropping, and electronic fraud, security is paramount. This book, provides integrated, comprehensive, up-to-date coverage of Internet-based security tools and applications. It also presents a practical survey of applications and standards with an emphasis on applications that are widely used on the Internet and for corporate networks. Additional learning materials such as two exclusive chapters – Network Management Security, and Legal and Ethical Aspects along with host of online appendices, a set of homework problems and solutions, 24 keypapers from professional literature are being made available for use by the readers. Author: William Stallings. Published by Pearson Education. Pages: 432. Price: Rs. 399=/. More about the book at [http://goo.gl/t7RFE](http://goo.gl/t7RFE) Readers of CSI-eNL can get this book at 20% discount with free shipping. Contact: [john.mathews@pearson.com](mailto:john.mathews@pearson.com) (This book is being given as a prize to the Info Quiz Winners)
**Book Summaries**

Concise summaries of the best business books from the website www.bizsum.com are included in this column. The publishers -- EBSCO Publishing have come forward to offer one month free access to the book summaries website to TWO winners of the Info Quiz.

**The Power of Presence: Unlock Your Potential to Influence and Engage Others.** By: Kristi Hedges. The ability to command attention and inspire commitment plays a defining role in people’s relationships, their ability to garner buy-in, and even their compensation. Those described as having charisma, magnetism, or a compelling personality have the corporate “it factor” to open doors that intellectual acumen alone cannot. In this book, the author outlines the I-Presence™ method, a developmental approach to building a compelling presence. This three-part process shows leaders how to create an authentic, commanding, and inspirational presence by conditioning their personal mindset, building interpersonal connections, and developing superior communications skills. More at [http://www.bizsum.com/summaries/power-presence](http://www.bizsum.com/summaries/power-presence) Read similar book summaries at [www.bizsum.com](http://www.bizsum.com) at an exclusive 20% discount on the subscription extended to CSI-eNL readers. Use the code BBSCSI2012. A lucky winner of Info Quiz will get free access to “Business Book Summaries” for one month.

**10 Steps To Be A Successful Manager.** By: Lisa Haneberg. Effective management practices enable organizations to identify new opportunities, execute strategies successfully, and complete projects on time and on budget. Then author, in this book, describes the methods (outlined below) that managers must adopt to run a business. Clarify, Negotiate, and Commit to Your Role: Understand Your Expected Results; Know Your Piece of the Business; Build a Great Team; Choose Employees Wisely; Define and Model Excellence; Plan the Work and Work the Plan – Flexibly; Obliterate Barriers; Proactively Manage Change and Transition; and Leave a Legacy of Capacity to Produce. This comprehensive guidebook is intended for managers at all levels and with varying years of experience. More at [http://www.bizsum.com/summaries/10-steps-be-successful-manager](http://www.bizsum.com/summaries/10-steps-be-successful-manager) at an exclusive 20% discount on the subscription extended to CSI-eNL readers. Use the code BBSCSI2012. A lucky winner of Info Quiz will get free access to “Business Book Summaries” for one month.

**InfoQuiz--2012-04-01** (NINE Prizes to Win – FOUR Prizes of Rs. 500/- each, THREE books, TWO free one month access to Business Book Summaries)

2. “Software gets slower faster than hardware gets faster” is known as ------ Law.
3. The year 2012 is being celebrated as the 100th Birth Anniversary of which computer pioneer?
4. Who has become the first person to surpass 20 million followers on Twitter?
5. Name the new book recently written by the co-author of the famous book “The C Programming Language”, Brian W. Kernighan

Email your answers by **30th Apr 2012** to csi.infoquiz@gmail.com with subject “infoquiz-2012-04-01”. Please provide your name, designation, company/institution, full postal address (to send the prize) and the contact phone nos. after the answers. There are NINE prizes to win. TWO prizes of Rs. 500/= each by SRA Systems ([www.srasys.com](http://www.srasys.com)) and TWO prizes of Rs. 500/= each by VictoryMind Educare Services. THREE prizes will be in the form of books which are briefly reviewed in this edition of the newsletter. They are being offered by Wiley India Pvt. Ltd ([www.wilevindia.com](http://www.wilevindia.com)), Tata McGraw Hill Education Pvt Ltd ([www.tmhshop.com/]) and Pearson Education ([http://www.pearsoned.co.in](http://www.pearsoned.co.in)). Other TWO prizes are free one month access to Business Book Summaries from EBSCO Publishing ([www.bizsum.com](http://www.bizsum.com)). Answers along with the winners’ info will be published in the next issue.

**Answers & Winners of InfoQuiz-2012-03-01**

- Recycle, Steve Jobs, Tulip Telecom, Motorola, Facebook
- Rs. 500/= from SRA Systems – Mr. T.U. Peter (Chennai) & Mr. Abhishek V. Potnis (Mumbai)
- Rs. 500/= from Victory Mind Educare Services – Mr. Aayush Agarwal (Bhubaneswar) & Ms. Soumya Sharma (Gwalior)
- Book from Wiley India – Mr. Raghavendra Kumar (Hyderabad)
- Book form the author Mr. Vicky Shah – Mr. S. Rajasekaran (Chennai)

**About the CSI-eNewsletter**

CSI-eNewsletter is a compilation of information from different sources with due acknowledgement to the respective sources. We hope these would be of interest to ICT professionals, academicians and students and serve as reference Pl. note that we do not endorse products/services referred in the newsletter. The CSI-eNL is published on 1st of every month.
